

FUNCTIONAL AND PERFORMANCE TESTING

Performance Testing

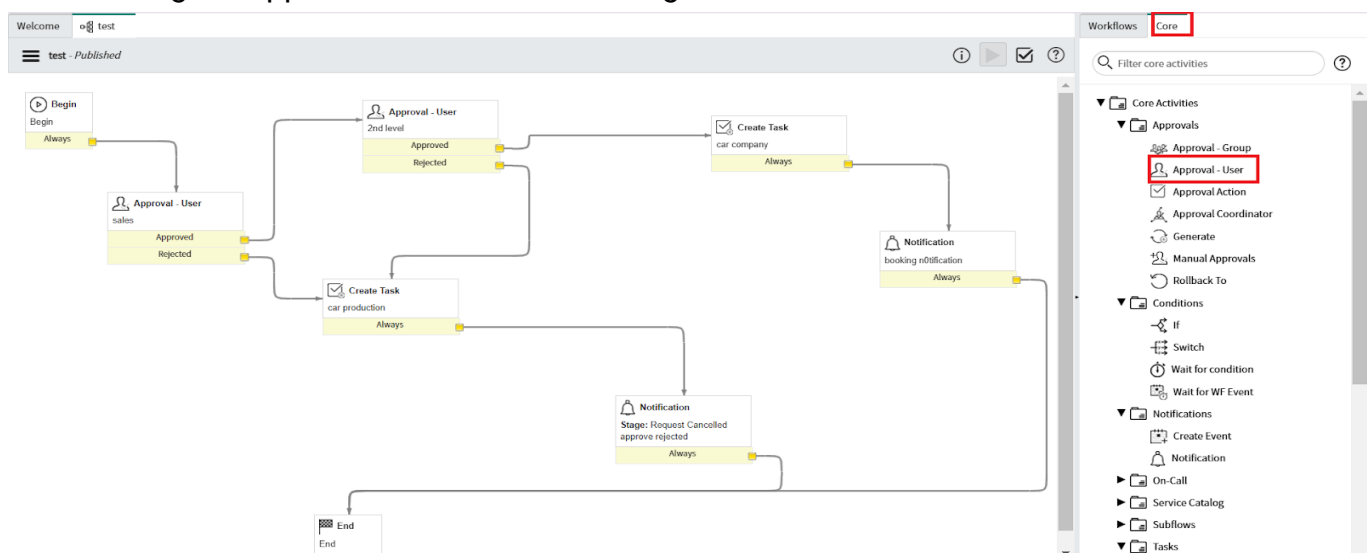

Milestone 8: Work Flow:

Purpose: A car catalog showroom management workflow aims to streamline the process of showcasing, selling, and managing vehicles within a dealership. It typically involves features like inventory management, customer relationship management, sales tracking, and reporting, all designed to enhance efficiency, improve customer experience, and ultimately boost sales.

Uses: A car catalog showroom management workflow typically uses modules for inventory management, sales management, customer management, and reporting. These modules help streamline processes like adding new cars, managing customer information, tracking sales, and generating reports on sales performance.

Steps:

1. Navigate to Homepage.
2. Click on all search Workflow Editor.
3. Click on New Workflow.
4. Under the name field search for Test Select that record.
5. After creating workflow you can see begin and end.
6. Drag the approval user from core and give name as sales

7. Give the user as a sales person.

Activity Properties: Approval - User ?

Workflow Activity
sales [Diagrammer view*]

Name sales

Stage

When to run

Specify the conditions that, when met, cause a user approval to be generated. [More Info](#)

Condition (empty)

Approvers

Specify the users whose approval will be requested. To edit this field, click the lock icon. To select specific users by name, use the lookup list. To select users from field values on the current record at runtime, click the tree icon. Each user will be assigned an individual approval record.

| Users | Groups |
|--------------|--------|
| sales person | |

Check 'Advanced' to use a script for creating additional user approvals. When you check Advanced, a text box appears where you can enter your script. In the script, set the variable 'answer' to a comma-separated list or an array of user and/or group ids.

Advanced ☐

8. Drag the approval user from core and give name 2nd level.

9. Add a user as supervisor.

Advanced ☐

10. Drag create task from core and give name as car company

11. Give task type car fulfilment table and priority-1.

In 'Task value from' specify the source of data for populating the fields in the new task. Select from Fields, Template, or Values. Once the source is selected, the appropriate fields will display.

| | | | |
|------------------|--------------------|-----------------|---|
| Task values from | Values | | |
| Set values | car status | Ready to pickup | X |
| | State | Closed Complete | X |
| | -- choose field -- | -- value -- | |

Schedule

Select how workflow determines the task's duration, due date, and schedule. In 'Time zone based on' specify how workflow should determine the timezone used to calculate task duration. Select 'no time zone' to use

12. Give task values from values
13. Set values as car status Ready to Pickup.
14. State Closed Complete and submit.

In 'Task value from' specify the source of data for populating the fields in the new task. Select from Fields, Template, or Values. Once the source is selected, the appropriate fields will display.
